Broad Biomedical Post-baccalaureate Scholars Program

A two-year research and career development opportunity
ABOUT THE BROAD INSTITUTE
The Broad Institute is a non-profit, independent research institute and global leader in genomics and biomedicine. A deeply collaborative community, the Broad brings together more than 300 faculty and more than 1,500 scientists from across MIT, Harvard and Harvard-affiliated hospitals, working together to solve critical problems in biomedicine. Organized around disease areas, the Broad’s hybrid model combines the creativity of academia with the innovation of industry to develop new technologies and therapeutics at a scale that cannot be accomplished by a single laboratory.

WHAT IS BROAD BIOMEDICAL POST BACCALAUREATE SCHOLARS PROGRAM (BBPS)?
This innovative two-year program engages talented participants in comprehensive and immersive research, academic and career guidance. The program is designed to diversify the biomedical research field by supporting the development of knowledge, expertise and skills both inside and outside the lab.

PROGRAM ELIGIBILITY
This program is open to individuals with a demonstrated interest in issues around diversity and inclusion in STEM disciplines. Students from underrepresented backgrounds are especially encouraged to apply.
Applicants must also meet the following criteria:
• Have U.S. citizenship or permanent residency
• Completed a degree from a four-year university or college no more than one year before the start of the program
• Majored in the biological, physical or computer sciences, engineering or mathematics
• Attained a minimum GPA of 3.3 on a 4.0 scale
• Participated in significant prior research experience
• Interest in pursuing a graduate degree (M.A./M.S., Ph.D., or M.D.-Ph.D. only) upon completion of the program

PROGRAM BENEFITS
BBPS participants will carry out research as paid, full-time Computational Associates or Research Associates, working side by side with leading scientists at the Broad Institute.
Participants will receive a salary that is competitive with local first year graduate student stipends (depending on experience and skills) and access to health benefits. In addition, BBPS scholars will engage in academic and professional development opportunities including:
• Comprehensive scientific communication training
• Development of individualized training plan
• Career-oriented seminars and workshops
• Discussions of topics such as scientific collaborations, ethics, support networks, stress management, diversity and inclusion, and the culture around science
• Graduate school preparation (statements, recommendations, GRE, etc.)
• Travel sponsorship to annual NHGRI conference

IMPORTANT DATES
Application available
Late-September 2022
Application deadline
February 25th, 2023 at 11:59pm EST
Apply by January 15th for early consideration.
Acceptance into this program is contingent upon receiving a job offer from a lab at the Broad.
Start Date
June – August 2023

HOW TO APPLY
For admittance into this program applicants must first apply for an open position as either a Research Associate (RA) or Computational Associate (CA) through our website. When filling out the application, the applicant must opt-in for consideration into the post-bac program. Acceptance into this program is contingent upon receiving a job offer from a lab at the Broad.

For more information and to apply, visit our website at broad.io/bbps or contact us at bbps@broadinstitute.org
